

Britz 113511A

IN THE SPECIFICATION:

Please change the Title at page 1, to:

Free Space Duplexed Optical Communication Employing a Telescope

Please replace page 12 in its entirety with the following:

ABSTRACT

A free space wavelength duplexed system includes a first and second terminals where each terminal includes a receiver part and a transmitter part, and the receiver includes a telescope, and optical-to-electrical converter, and an optical amplifier coupled between the telescope and the optical-to-electrical converter.
